XM radio - Don't mess with a good thing. I love XM and anything extra that I can get from their programming can help me and my family!
XM Radio saved our lives!!!

While traveling back from a vacation, from Texas to our home in Oklahoma we listened to the weather channel on our XM to learn about severe weather in our area. We were able to make a decision to stay where we were and keep clear of the unstable weather conditions we were about to drive straight into! If you take this away, you are possibly putting people into danger by taking away information that could possibly save lives!!!!!!!!!! Truck drivers working to keep the US's economy strong use XM to keep informed of the weather when they are headed home to their families and while they are away to know if their families are in danger of having bad weather, traveling salespeople, vacationing families....Think about this before you change something you have not needed and someday may need to rely on! It is just a piece of mind that I don't think I can live without now that I have had it I sure don't want it TAKEN AWAY!
